Lab 6

Due: Tuesday, November 10

A *palindrome* is a word or phrase that is spelled the same way when reversed:

- "racecar"

- "rotator"

- "top spot"

- "no lemon no melon"

Write a program that asks the user for a word or phrase and determines whether or not it is a palindrome. Examples:

```
Enter a word or phrase:  radar
Congratulations!  It's a palindrome!

Enter a word or phrase:  football
I am so sorry, but it is not a palindrome :(

Enter a word or phrase:  taco cat
Congratulations!  It's a palindrome!
```
